Definitions for Column Headers

Column Header	Definition
ENERGY STAR Partner	An organization that signed a Partnership Agreement with EPA to manufacture or private label ENERGY STAR qualified products.
Brand	An identifier assigned by the manufacturer or private labeler to a product or family/series of products for sales and marketing purposes.
Model Name	An identifier assigned by the manufacturer or private labeler to a product or family/series of products for sales and marketing purposes.
Model Number	A distinguishing identifier, usually alphanumeric, assigned to a product by the manufacturer or private labeler.
Additional Model Information	An identifier assigned by the manufacturer or private labeler to a product or family/series of products for sales and marketing purposes. This column includes alternative means to identify the model/model family (e.g., additional model names, additional model numbers, retailer SKUs, product descriptions).
Door/Wall Type	The type of door/wall (e.g., transparent, solid).
Number of Doors	Amount of doors available on the hot food holding cabinet.
Internal Volume	Determined using straight-line segments following the gross interior dimensions of the appliance (Interior Volume = Interior Height x Interior Width x Interior Depth).
Energy Usage (Watts)	The rate of a hot food holding cabinets energy consumption while it is maintaining or holding at the control set point, without using a humidity-generating device.
Maximum Idle Energy Rate (Watts)	Calculated value utilizing the equations in Section 3, Table 1 of the ENERGY STAR Product Specification for Commercial Hot Food Holding Cabinets.
Date Available on Market	The date that the model is available for purchase.
Date Qualified	The date on which the product was confirmed to meet the ENERGY STAR specification.

Key Efficiency Criteria

Table 1: Maximum Idle Energy Rate Requirements for ENERGY STAR Qualification	
Product Interior Volume (Cubic Feet)	**Product Idle Energy Consumption Rate (Watts)**
0 < V < 13	≤ 21.5 V
13 ≤ V < 28	≤ 2.0 V + 254.0
28 ≤ V	≤ 3.8 V + 203.5

Note:

 V = Interior volume in cubic feet (cu. ft)
