Key Efficiency Criteria

Performance Characteristic	Specification Indoor Fixtures	Specification Outdoor Fixtures Efficient Light Source	Specification Outdoor Fixtures Reduced Operating Time
System Efficacy* Per Lamp Ballast Platform in Lumens Per Watt (LPW)	≥ 50 LPW for all lamp types below 30 total listed lamp watts ≥ 60 LPW for all lamp types that are ≤ 24 inches and ≥ 30 total listed lamp watts ≥ 70 LPW for all lamp types that are ≥ 24 inches and ≥ 30 total listed lamp watts	≥ 40 LPW for all lamp types below 15 total listed lamp watts. ≥ 50 LPW for all lamp types over 15 total listed lamp watts up to 30 total listed lamp watts ≥ 60 LPW for all lamp types over 30 total listed lamp watts	N/A
Lumen Maintenance at 40% of Rated Life	For lamps indicated on the fixture packaging or shipped with the fixtures, the lamp shall have an average rated lumen maintenance of at least 80% of initial lamp lumens at 40% (4,000 hours minimum) rated lamp life.	N/A	N/A
Power Factor	≥ 0.5	≥ 0.5	N/A
Average Rated Lamp Life	For lamps shipped with the fixtures, the average rated life of the lamp must be > 10,000 hours. If the lamp is not shipped with the fixture, product packaging must meet the requirements set forth in the “Product Packaging for Consumer Awareness” section of this Table.	For lamps shipped with the fixtures, the average rated life of the lamp must be >10,000 hours. If the lamp is not shipped with the fixture, product packaging must meet the requirements set forth in the “Product Packaging for Consumer Awareness” section of this Table.	N/A
Color Rendering Index	≥ 80 for compact fluorescent lamps. ≥ 75 for linear fluorescent lamps.	N/A	N/A
Correlated Color Temperature	For lamps shipped with the fixtures, the lamps must have one of the following designated correlated color temperatures (CCT): 2700K, 3000K, 3500K, 4100K, 5000K, or 6500K. If the lamp is not shipped with the fixture, product packaging must meet the requirements set forth in the "Product Packaging for Consumer Awareness" section of Table 1 in the RLF 4.2 specification.	N/A	N/A
Warranty	A written warranty must be included with fixture packaging at shipment, which covers repair or replacement of defective parts of the fixture housing, optics, trim and electronics (excluding the lamp) for a minimum of two years from the date of purchase.	A written warranty must be included with fixture packaging at shipment, which covers repair or replacement of defective parts of the fixture housing or electronics (excluding the lamp) for a minimum of two years from the date of purchase. Maximum Input Power	N/A	150 Watts	250 Watts
Automatic Daylight Shutoff	N/A	The fixture must contain an integrated photosensor that automatically prevents operation during daylight hours. In addition, the control must automatically reactivate within 24 hours of a manual override or testing operation.	The fixture must contain an integrated photosensor that automatically prevents operation during daylight hours. In addition, the control must automatically reactivate within 24 hours of a manual override or testing operation.
Motion Control	N/A	N/A	The fixture must contain an integrated motion sensor that employs infrared sensing technology. The sensor must: • allow automatic shut-off of the lamp within 15 minutes of being manually activated by a switch or automatically activated by the sensor, and • automatically reset to sensing mode within 24 hours of a manual override or testing operation. The fixture must: • have an indicator that visibly or audibly informs the device operator that the motion sensor is operating properly, or that it has failed or malfunctioned.

Notes:

* Take performance and electrical measurements at the end of the 100-hour aging period according to ANSI C78.5. The lamp efficacy shall be the average of the total sample size for each testing orientation selected for the submittal. Use wattages places on packaging, not measured wattage, to select proper efficacy category in this table.

Efficacies are based on measured values for lumens and wattages from pertinent test data. Wattages and lumens placed on packages may not be used in calculation and are not governed by this criterion.
