ENERGY STAR Notebooks Qualified Products List

List Posted on January 16, 2013

Below are currently qualified ENERGY STAR models available for sale in the U.S. and Canada.

* Idle power levels are based on hardware characteristics specific to each system. Some models may be customized by the consumer in ways that change applicable idle level category to which they are evaluated and manufacturers are required to report power data in idle for the highest power configuration at each level under which they would like the system to qualify. For a description of categories for idle criteria, please refer to the Version 5.0 ENERGY STAR Computers Eligibility Criteria at http://www.energystar.gov/ia/partners/product_specs/program_reqs/Computer_Spec_Final.pdf.

** TEC stands for Typical Energy Consumption, and is defined as a method of testing and comparing the energy performance of computers, which focuses on the typical electricity consumed by a product while in normal operation during a representative period of time.

*** In Computers 4.0 this field was labeled Standby. In Computers 5.0 this field is labeled Off.

Product (Unit) Type	Partner Name	Brand	Model Name	Model Number	Processor Brand	Processor Name	Processor Speed	Category	Operating System Name	TEC Category A System Memory (GB)	TEC Category B System Memory (GB)	TEC Category C System Memory (GB)	115V A Off***	115V A Power in Sleep	115V A Power in Idle*	ENERGY STAR TEC** Requirement - Base (Cat. Key Efficiency Criteria

Version 5.0 Energy Efficiency Requirements	
Product Type	**Requirements**
Notebooks and Tablets	Category A: <= 40.0 kWh Category B: <= 53.0 kWh Category C: <= 88.5 kWh Note: Computers with more advanced memory, graphics, or hard drive capability may qualify for additional energy allowances (capability adjustments) above these amounts.
Version 5.0 Power Supply and Power Management Requirements for Computers	
Power Management	Monitor Sleep Mode: within 15 minutes of user inactivity System Sleep Mode: within 30 minutes of user inactivity Wake On LAN and Wake Management features (for some systems)
