Oiled Bronze Suite (NAR)

Innovative New Finish

From an innovator in kitchen appliance design comes a new finish that offers a warm, distinctive alternative to the cooler, commercial look of stainless steel. Jenn-Air® now offers a complete collection of appliances in Oiled Bronze, a richly hued finish inspired by the soft glow and patina of bronze sculpture and fixtures. The Oiled Bronze suites includes gas and electric cooktops, single and double wall ovens, a warming drawer, refrigerator and dishwasher.

The warm bronze, accented with stainless steel handles, creates a look that is both welcoming and sophisticated. And, as one would expect from a brand so strongly associated with cooking innovation, these appliances offer a level of performance and features that even the most serious cooks will appreciate.
