Labelling

The labelling of your product models registered for ENERGY STAR is currently optional but highly recommended. The federal ECOenergy Retrofit Program and other provincial and utility incentive programs look for the label as proof-of-purchase of ENERGY STAR models qualified for the area of installation. **Please read the promotional and labelling guidelines carefully.** Fenestration manufacturers must use the qualification label templates provided. Any alternative must be approved by your NRCAN account manager. Each manufacturer must print their own labels. Labels are NOT provided by NRCAN.
