Gorell Green

Gorell works hard to be an environmentally responsible, "green" manufacturer. It's our goal to produce the most energy-efficient products available. We strive to save energy, safeguard the environment and reduce our carbon footprint. This helps decrease America's dependence on foreign countries for oil and other resources.

- More than 94 percent of our products are ENERGY STAR® qualified.
- Gorell is one of only two window manufacturers to earn Green Seal™ certification.
- Gorell replacement windows, new-construction windows, hurricane windows and patio doors are made of highly sustainable vinyl that doesn't emit toxins during its useful life.
- Gorell manufacturing facilities and processes are friendlier to the environment.
- Gorell makes every effort to reuse and recycle materials.

To reinforce our commitment to manufacturing "green" vinyl windows and patio doors, Gorell works with numerous organizations with similar environmental philosophies and objectives:

GREEN SEAL™

Gorell's five replacement double-hung window models have earned America's prestigious [Green Seal](#) certification. Green Seal is a national non-profit organization that helps consumers choose environmentally responsible products.

ENERGY STAR®

A longtime, highly active partner in the [ENERGY STAR program](#), Gorell takes great pride in manufacturing a remarkably high percentage of ENERGYSTAR qualified products. Gorell received the ENERGY STAR Sustained Excellence Award in 2006, 2007 and 2008—and has been an ENERGY STAR Partner of the Year in 2004, 2005, 2006, 2007 and 2008.

GREENSPEC

Gorell high-performance vinyl replacement windows meet GreenSpec's stringent "green building" criteria. GreenSpec evaluates products on a wide range of environmental qualities.

GREEN BUILDING PAGES

Gorell is listed with Green Building Pages, an on-line, sustainable design and decision-making resource that builders and consumers use to select building materials that preserve health and the environment.
