OVERVIEW

Gorell AIP Sliding Patio Doors provide maximum protection against hurricanes and other violent weather conditions. These super-tough doors have a Design Pressure rating of 50 and are tested and approved for "D" Level performance. In addition to great protection, Gorell AIP patio doors provide a myriad of other benefits—including safety, security, sound reduction, energy efficiency and beauty.

STANDARD FEATURES AND BENEFITS:

- **Double weather stripping** applied to the door panels offers better insulation.
- **Heavy-duty door panels**—reinforced with galvanized steel in the vertical stiles—provide exceptional strength and durability.
- **Soft white vinyl frames** feature an exceptionally smooth, clean surface so that your door will look beautiful for decades.
- **Exterior key lock set** is standard for homeowners who would like to use their sliding door as a keyed entry.
- **Fusion-welded sash corners** provide superior strength and ensure that the door is perfectly square.
- **Tough AIP hurricane glass system**—with three panes of glass and a protective polyvinyl butyryl interlayer—provides exceptional protection against airborne debris. ENERGY STAR® qualified glass—with Low-E and argon—will help keep your home energy bills low and comfort levels high.
- **Exceptionally durable master frame**, made of heavy-duty premium vinyl, features a multi-chambered design for superior insulation.
- **Structural steel implanted into the vertical jambs** makes the doorframe exceptionally tough and sturdy.
- **Solid steel ball-bearing double tandem rollers and nylon wheels** result in quiet, exceptionally smooth operation and easy adjustment.
- **Independent secondary locking hardware** enhances security helps to prevent break-ins.
- **Elegantly styled, color-matched handles** with a powder-coated finish will never tarnish or corrode.
- **Anodized extruded aluminum sash rolling track** prevents corrosion.
