What is the ENERGY STAR® Program?

If you want to save money on your heating and cooling bills—and ensure your home is as comfortable as it can be—then you will surely be interested in windows and doors that are ENERGY STAR® qualified.

The ENERGY STAR label can be affixed only to windows and doors that meet specific U-value and Solar Heat Gain Coefficient ratings for one or more regions of the U.S. These ratings are achieved through independent testing done to NFRC standards.

All Gorell vinyl hurricane windows meet ENERGY STAR requirements and therefore are ENERGY STAR labeled.

Gorell has been an ENERGY STAR manufacturing partner since 1999. The company was named 2006 and 2007 ENERGY STAR Sustained Excellence Award winner and Partner of the Year from 2004 to 2007, in large part due to the high percentage of ENERGY STAR qualified products it manufactures.

Learn more about the ENERGY STAR program at www.energystar.gov

WHOLE WINDOW U-VALUES

You can determine how energy efficient windows are by comparing "Whole-Window" U-values used by the National Fenestration Ratings Council (NFRC) to qualify windows for the ENERGY STAR® label. The lower the U-value rating, the more thermally efficient your new windows will be. Learn more about the NFRC at www.nfrc.org.
