

Get a \$75 Rebate from LIPA on a new ENERGY STAR® Refrigerator

A new ENERGY STAR qualified refrigerator is at least 40% more efficient than models sold just 10 years ago. That's important considering your refrigerator is one of the highest energy consuming appliances in your home.

When you purchase an ENERGY STAR qualified refrigerator larger than 16 cubic feet, your savings start right away with a **\$75 rebate** from LIPA.

For a list of the models that qualify and participating retailers, visit www.lipower.org/efficiency or call our Energy Infoline at 1-800-692-2626.

We'll Give Your House a Check-up. *You'll Save Hundreds of Dollars Every Year.*

For LIPA residential customers with an electric heat system and/or high energy use* central air conditioning, our **Home Performance *Direct*** program can reduce your energy bills while enhancing the health and comfort of your home.

A trained energy expert will conduct a **FREE Comprehensive Home Audit (CHA)** and recommend solutions for energy savings all around your home.

Home Performance *Direct* provides other **FREE** services, including installation of compact fluorescent light bulbs (CFLs) and attic air-sealing and duct-sealing to stop significant drafts.

Visit www.lipower.org/efficiency for more information or call **1-877-ESTAR-LI (378-2754)** to have one of LIPA's energy experts help determine if you qualify.

**High energy use central air conditioning typically means summer use is 20% or more of the annual use.
Other factors apply.*
