

ENERGY STAR Room Air Cleaners Product List

List Posted on May 13, 2013

Below are currently qualified ENERGY STAR models available for sale in the U.S. and Canada

* Disclaimer: Clean Air Delivery Rate (CADR) is a measure of the amount of contaminant-free air delivered by the room air cleaner. The ENERGY STAR specification requires that manufacturers measure CADR according to AHAM/ANSI AC-1-2002, a test procedure developed by the Association of Home Appliance Manufacturers (AHAM), and recognized by the American National Standards Institute (ANSI). For more information about CADR please visit :

www.cadr.org

When considering the purchase of an ENERGY STAR qualified room air cleaner, the comparison should not solely be based on CADR. The CADR of a specific air cleaner model is affected by a number of factors included the size of the model; larger units often have higher CADRs. For more information on the appropriate sized room air cleaner for your application please refer to individual manufacturers' web sites or ask your retailer.

Definitions for Column Headers

Column Header	Definition
ENERGY STAR Partner	An organization that signed a Partnership Agreement with EPA to manufacture or private label ENERGY STAR qualified products.
Brand	An identifier assigned by the manufacturer or private labeler to a product or family/series of products for sales and marketing purposes.
Model Name	An identifier assigned by the manufacturer or private labeler to a product or family/series of products for sales and marketing purposes.
Model Number	A distinguishing identifier, usually alphanumeric, assigned to a product by the manufacturer or private labeler.
Additional Model Information	An identifier assigned by the manufacturer or private labeler to a product or family/series of products for sales and marketing purposes. This column includes alternative means to identify the model/model family (e.g., additional model names, additional model numbers, retailer SKUs, product descriptions).
Dust CADR	CADR stands for Clean Air Delivery Rate. This is the measure of the delivery of specified, particulate-free air produced by a household electric, cord-connected room air cleaner.
Tobacco Smoke CADR	CADR stands for Clean Air Delivery Rate. This is the measure of the delivery of specified, particulate-free air produced by a household electric, cord-connected room air cleaner.
Pollen CADR	CADR stands for Clean Air Delivery Rate. This is the measure of the delivery of specified, particulate-free air produced by a household electric, cord-connected room air cleaner.
Dust CADR/Watt	The dust clean air delivery rate per Watt of power.
Standby Power	The average power in standby mode, measured in Watts.
Date Available on Market	The date that the model is available for purchase.
Date Qualified	The date on which the product was confirmed to meet the ENERGY STAR specification.

Key Efficiency Criteria

Equipment	Specification
Room air cleaner minimum performance requirement*	≥ 2.0 CADR/Watt (Dust)
Standby Power Requirement**	≤ 2 Watt(s)

Notes:

CADR: Clean Air Delivery Rate

*CADR for dust must be used when determining the energy efficiency (CADR/Watt) of the room air cleaner. Qualifying air cleaner models must produce a minimum 50 CADR for dust.

**Qualifying models that perform secondary consumer functions (e.g., clock, remote control) must meet the standby power requirement.
