Definitions for Ceiling Fan Product Listing Column Headers

Column Header	Definition
ENERGY STAR Partner	An organization that signed a Partnership Agreement with EPA to manufacture or private label ENERGY STAR qualified products.
Brand	An identifier assigned by the manufacturer or private labeler to a product or family/series of products for sales and marketing purposes.
Model Name	An identifier assigned by the manufacturer or private labeler to a product or family/series of products for sales and marketing purposes.
Model Number	A distinguishing identifier, usually alphanumeric, assigned to a product by the manufacturer or private labeler.
Additional Model Information	This column includes for the qualified model or family, family members, additional model names, model numbers and other identifying information associated with a product or family/series of products for sales and marketing purposes. Other identifying information includes, but is not limited to, SKUs, UPC codes, retail numbers, and/or descriptions of models included/not included in the reported Model Family.
Ceiling Fan Size	The diameter (in inches) of a ceiling fan tip to tip.
Airflow Efficiency-Low	The ratio of airflow divided by power at a specific residential ceiling fan setting expressed in cubic feet per minute/Watt (CFM/watt) at low speed.
Airflow Efficiency-Medium	The ratio of airflow divided by power at a specific residential ceiling fan setting expressed in cubic feet per minute/Watt (CFM/watt) at medium speed.
Airflow Efficiency-High	The ratio of airflow divided by power at a specific residential ceiling fan setting expressed in cubic feet per minute/Watt (CFM/watt) at high speed.
Motor Warranty	Qualifying products shall provide a warranty of at least 30 years for the motor of qualifying residential ceiling fans.
Components Warranty	Qualifying products shall provide a warranty of at least one year for all other components (that is, other than motor) of qualifying residential ceiling fans.
Date Available on Market	The date that the model is available for purchase.
Date Qualified	The date on which the product was confirmed to meet the ENERGY STAR specification.

Key Efficiency Criteria

Qualified models meet all ENERGY STAR requirements as listed in the Version 3.0 ENERGY STAR Program Requirements for Ceiling Fans that are effective as of April 1, 2012.

Air Flow Efficiency Requirement		
Fan Speed	Efficiency Requirement	Efficiency Requirement
Low	1,250 CFM	155 CFM/Watt
Medium	3,000 CFM	100 CFM/Watt
High	5,000 CFM	75 CFM/Watt

Notes:

Qualifying ceiling fan models must come with a minimum 30-year motor warranty; one-year component(s) warranty; and 2-year light kits warranty.

Residential ceiling fan airflow efficiency is defined on a performance basis: CFM of airflow per watt of power consumed by the motor and controls. The motor, blades, and controls are treated as a system, which allows for multiple approaches to reach a given efficiency level. Efficiency is measured on each of three fan speeds (low, medium, high) and must meet the minimum requirements outlined in the table above.
