Definitions for Ceiling Fan Product Listing Column Headers

Column Header	Definitions
ENERGY STAR Partner	An organization that signed a Partnership Agreement with EPA to manufacture or private label ENERGY STAR qualified products.
Brand	An identifier assigned by the manufacturer or private labeler to a product or family/series of products for sales and marketing purposes.
Model Name	An identifier assigned by the manufacturer or private labeler to a product or family/series of products for sales and marketing purposes.
Model Number	A distinguishing identifier, usually alphanumeric, assigned to a product by the manufacturer or private labeler.
Additional Model Information	This column includes for the qualified model or family, family members, additional model names, model numbers and other identifying information associated with a product or family/series of products for sales and marketing purposes. Other identifying information includes, but is not limited to, SKUs, UPC codes, retail numbers, and/or descriptions of models included/not included in the reported Model Family.
Product Type	Ceiling fan only (no light kit) or ceiling fan with light kit.
Ceiling Fan Size	The diameter (in inches) of a ceiling fan tip to tip.
Airflow Efficiency - Low	The ratio of airflow divided by power at a specific residential ceiling fan setting expressed in cubic feet per minute/Watt (CFM/watt) at low speed.
Airflow Efficiency - Medium	The ratio of airflow divided by power at a specific residential ceiling fan setting expressed in cubic feet per minute/Watt (CFM/watt) at medium speed.
Airflow Efficiency - High	The ratio of airflow divided by power at a specific residential ceiling fan setting expressed in cubic feet per minute/Watt (CFM/watt) at high speed.
Ceiling Fan Motor Warranty	Qualifying products shall provide a warranty of at least 30 years for the motor of qualifying residential ceiling fans.
Ceiling Fan Components Warranty	Qualifying products shall provide a warranty of at least one year for all other components (that is, other than motor) of qualifying residential ceiling fans.

Column Header	Definitions
Lighting Technology Used	The light source technology utilized by the fixture: compact fluorescent light (CFL), light emitting diode (LED), or halogen.
Light Output	The amount of light emitted by the light source or light fixture. Non directional fixtures (with removable light sources i.e. GU24 base bulbs) are measured at the light source and do not account for light lost from the fixture, while other fixtures meant to put light on a specific application (e.g. recessed downlights, under cabinet lights, accent lights, cove lights) are measured at the fixture level, only counting the light that escapes the fixture.
Total Input Power	Total power consumed by the luminaire while in use.
Luminaire Efficacy	The quotient of the total luminous flux (lumens) emitted by the fixture over the total power input (Watts). It is expressed in lumens per watt (lm/W). For ENERGY STAR qualified fixtures this applies to light fixtures that are considered directional and are measured at the fixture level. This includes the following residential grade directional fixture types: line-voltage track lights, ceiling fan light kits, undercabinet and cove lighting, downlights, recessed, pendant or surface mounted and includes retrofit kits for existing recessed cans. This also includes the following LIMITED commercial fixture types: Accent lights such as line-voltage track lights, under cabinet task lights, portable desk task lights, downlights, recessed, pendant or surface-mounts BUT EXCLUDES typical commercial and industrial fixtures such as recessed troffers or linear forms (e.g. linear fluorescent pendants) typically used in office spaces.
Power Factor	Ratio of real power flowing to the lamp to the apparent power in the circuit. A lamp with a lower power factor will draw more current than a lamp with a higher power factor of the same wattage.
Correlated Color Temperature	A description of the "color" of a light source measured on the Kelvin (K) scale. CFLs are available in a range of color temperatures. Lower values (2700-3000K) mean the white light has a warmer (red-yellow) tone, while higher kelvin (4100-6500K) mean the white light has a cooler (bluer) tone.
Color Rendering Index	Measure of the degree of color shift objects undergo when illuminated by the light source as compared with the color of those same objects when illuminated by a reference source of comparable color temperature.

Column Header	Definitions
Light Source Life	The expected useful life of the light source. Measured differently depending on the technology of the light source. For example, LED lighting expected useful life is based on the estimated point at which only 70% of the original light output remains, while for older technologies, like fluorescent and halogen, estimated useful life is based on the measured median sample life.
Special Features	Most fixtures are designed to operate on an on/off switch. However, some fixtures have been designed with features to perform in specialized applications, such as with dimmers, three-way, or photo cell controls. Special features and compatibility with controls should be clearly marked on the product packaging, cut sheet or web site for the product.
Notes	Indicates information on certification relevant to the consumer (i.e. product variations, unique issues concerning the model's listing, etc.).
Date Available on Market	The date that the model is available for purchase.
Date Qualified	The date on which the product was confirmed to meet the ENERGY STAR specification.
Markets	This list/dataset includes products sold in the U.S. and/or Canada and other ENERGY STAR partner countries.
ENERGY STAR Model Identifier	A unique string of characters used to identify models with the same performance characteristics. This sequence is generated by certification bodies and is reported as a single row of data on the lists of certified products.

Key Efficiency Criteria

Qualified models meet all ENERGY STAR requirements as listed in the Version 3.0 ENERGY STAR Program Requirements for Ceiling Fans that are effective as of April 1, 2012.

Fan Speed	Efficiency Requirement	Efficiency Requirement
Low	1,250 CFM	155 CFM/Watt
Medium	3,000 CFM	100 CFM/Watt
High	5,000 CFM	75 CFM/Watt

Notes:

Qualifying ceiling fan models must come with a minimum 30-year motor warranty; one-year component(s) warranty; and 2-year light kits warranty.

Residential ceiling fan airflow efficiency is defined on a performance basis: CFM of airflow per watt of power consumed by the motor and controls. The motor, blades, and controls are treated as a system, which allows for multiple approaches to reach a given efficiency level. Efficiency is measured on each of three fan speeds (low, medium, high) and must meet the minimum requirements outlined in the table above.

Criteria for ENERGY STAR Qualified Residential Ceiling Fans with Lighting	
Performance Characteristic	Specification Luminaires V1.2
Light Output	<p>Non-directional luminaires (those listed with a "Source Efficacy" value in column J): ≥ 800 lumens, or ≥ 450 lumens for fixtures with three sources or more.</p> <p>Directional fixtures: ≥ 125 lumens/foot for undercabinet, 200 lumens/foot for cove mount, 345 or 575 for downlights (depending on aperture size), 200 lumens per head for accent lights, 300 lumens for outdoor post-mounted luminaires.</p>
Source Efficacy (non-directional luminaires)	<p>≥ 65 lm/W</p> <p>≥ 70 lm/W after September 2013</p>
Luminaire Efficacy (directional luminaires)	<p>Dependent on fixture type/application starting at ≥ 29 lm/W</p>

Criteria for ENERGY STAR Qualified Residential Ceiling Fans with Lighting

Power Factor	Residential: ≥ 0.5 Commercial: ≥ 0.9 Solid state residential with input power greater than 5 watts: ≥ 0.7
Correlated Color Temperature	Lamps shipped with luminaires shall have one of the following nominal correlated color temperatures (CCT): 2700K, 3000K, 3500K, 4000/4100K, 5000K (commercial only)
Color Rendering Index	Ra ≥ 80
Rated Life of Light Source	Fluorescent and HID: $\geq 10,000$ hours Halogen incandescent: $\geq 2,500$ hours Solid state (LED): $\geq 25,000$ residential or $\geq 35,000$ commercial
