Definitions for Column Headers

Column Header	Definition
ENERGY STAR Partner	An organization that signed a Partnership Agreement with EPA to manufacture or private label ENERGY STAR qualified products.
Brand	An identifier assigned by the manufacturer or private labeler to a product or family/series of products for sales and marketing purposes.
Model Name	An identifier assigned by the manufacturer or private labeler to a product or family/series of products for sales and marketing purposes.
Model Number	A distinguishing identifier, usually alphanumeric, assigned to a product by the manufacturer or private labeler.
Additional Model Information	This column includes for the qualified model or family, family members, additional model names, model numbers and other identifying information associated with a product or family/series of products for sales and marketing purposes. Other identifying information includes, but is not limited to, SKUs, UPC codes, retail numbers, and/or descriptions of models included/not included in the reported Model Family.
Machine Type	Designates the type of dishmachine model, according to the following options: Under Counter Under Counter – Glasswasher Stationary Single Tank Door Pot, Pan, and Utensil Single Tank Rack Conveyor Multiple Tank Rack Conveyor Single Tank Flight Type Multiple Tank Flight Type
Sanitation Method	Describes the method for which the commercial dishwasher machine applies hot water or a chemical sanitizing solution for the purposes of cleaning dishware. The following are the sanitation method options: Chemical Sanitizing (Low Temp) Machine Hot Water Sanitizing (High Temp) Machine Dual Sanitizing Machine Dual sanitizing machines must meet both the high temp and low temp requirements presented in Table 1 of the Version 2.0 specification , to qualify as ENERGY STAR.

Column Header	Definition
Idle Energy Rate (kW)	For all dishwasher types, the dishwasher is considered "in idle mode" when it is not actively running but is still powered on and ready to wash dishes at the required temperature. The idle energy rate is the rate of energy consumed by the dishwasher while "holding" or maintaining wash tank water at the thermostat(s) set point during the time period specified in the ENERGY STAR Test Method for Commercial Dishwashers.
Water Consumption Gallons Per Rack (GPR)	Metric that represents the amount of water, in gallons, that is consumed while rinsing and sanitizing one rack of dishware. This water consumption metric is used to qualify under counter, single tank door, pot, pan, and utensil, single tank rack conveyor, and multiple tank rack conveyor machines. GPR is specified in the ENERGY STAR Test Method for Commercial Dishwashers.
Water Consumption Gallons Per Hour (GPH)	Metric that represents the amount of water, in gallons, that is consumed while rinsing and sanitizing dishware in one hour by the dishwashing machine. This water consumption metric is used for single tank flight type and multiple tank flight type machines. GPH is specified in the ENERGY STAR Test Method for Commercial Dishwashers.
Water Consumption Gallons per Square Foot (GPSF)	Metric that represents the amount of water, in gallons, that is consumed per one square foot of rack area while rinsing and sanitizing dishware. This water consumption metric is used for pot, pan, and utensil machines. GPSF is specified in the ENERGY STAR Test Method for Commercial Dishwashers.
Date Available on Market	The date that the model is available for purchase.
Date Qualified	The date on which the product was confirmed to meet the ENERGY STAR specification.
Markets	This list/dataset includes products sold in the U.S. and/or Canada and other ENERGY STAR partner countries.
ENERGY STAR Model Identifier	A unique string of characters used to identify models with the same performance characteristics. This sequence is generated by certification bodies and is reported as a single row of data on the lists of certified products.

Key Efficiency Criteria

Version 2.0

Qualified models meet all ENERGY STAR requirements as listed in the Version 2.0 ENERGY STAR Program Requirements for Commercial Dishwashers that are effective as of February 1, 2013.

Energy Efficiency Requirements for Commercial Dishwashers				
Machine Type	High Temp Efficiency Requirements		Low Temp Efficiency Requirements	
	Idle Energy Rate*	Water Consumption	Idle Energy Rate*	Water Consumption
Under Counter	≤ 0.50 kW	≤ 0.86 GPR	≤ 0.50 kW	≤ 1.70 GPR
Stationary Single Tank Door	≤ 0.70 kW	≤ 0.89 GPR	≤ 0.60 kW	≤ 1.18 GPR
Pot, Pan, and Utensil	< 1.20 kW	≤ 0.58 GPSF	≤ 1.00 kW	≤ 0.58 GPSF
Single Tank Conveyor	< 1.50 kW	≤ 0.70 GPR	≤ 1.50 kW	≤ 0.79 GPR
Multiple Tank Conveyor	< 2.25 kW	≤ 0.54 GPR	≤ 2.00 kW	≤ 0.54 GPR
Single Tank Flight Type	Reported	GPH ≤ 2.975x + 55.00	Reported	GPH ≤ 2.975x + 55.00
Multiple Tank Flight Type	Reported	GPH ≤ 4.96x + 17.00	Reported	GPH < 4.96x + 17.00

* Idle results should be measured with the door closed and represent the total idle energy consumed by the machine including all tank heater(s) and controls. Booster heater (internal or external) energy consumption should not be part of this measurement unless it cannot be separately monitored per the ENERGY STAR Test Method.

** GPR = gallons per rack; GPSF = gallons per square foot of rack; GPH = gallons per hour; x = maximum conveyor speed (feet/min as verified through NSF 3 certification) x conveyor belt width (feet).
