Add the following option to the 'Order Results by:' dropdown and make it the default when the product type = Small Scale Server or Thin Client - Efficiency: Idle for lowest model.

** Note ** - If All Types is selected in the Product dropdown the default sort for Efficiency will be removed. Efficiency (TEC or Idle) will become the secondary sort criteria. This is because the two measurements are not equivalent and cannot be sorted together.

Additionally, if anything except All Types is selected in the Product dropdown, remove the Product Type option from the Order Results By dropdown.
