

Energy Star Homes: 2011 Specifications and The Road Ahead

Attendees will learn:

- Building science basic principles that determine why buildings work and fail.
- How ENERGY STAR Qualified Homes specifications have developed over time to comprehensively address building science principles.
- How ENERGY STAR Qualified Homes specifications will be implemented with a new threshold and increased mandatory checklists.
- How homes meeting new specifications will make existing homes obsolete relative to performance and quality.
- What advanced technologies and practices are being promoted for a new ENERGY STAR Concept Home label.
- How the ENERGY STAR Concept Home serves as a road-map to net zero energy homes.
