

**Hunting and capturing the world's
pristine air to offer your customers**
no longer requires a passport.

Introducing the industry-leading **STAR
LINEUP M- and P-Series** heating and
cooling systems from **Mitsubishi Electric**.

*A breakthrough
in pure comfort.*

Amazing technology.

15 new ENERGY STAR® ratings.

9 new systems qualify for a tax credit.

You no longer have to travel to the four corners of the globe to find the ultimate air. Introduce yourself to the STAR LINEUP of heating and cooling systems from Mitsubishi Electric – groundbreaking designs created after extensive research into what you and your customers want and need.

More ENERGY STARs. More tax credits. We're the industry leader.

We have 15 new ENERGY STAR rated systems – with dramatic increases all the way up to 26 SEER. And we have 9 new systems that qualify for a federal tax credit of up to \$1500. As a result, you have an even more compelling story to attract customers and generate sales.

New technology revolutionizes the heat pump.

Unlike older, inefficient heat pumps – there is no cold air delivery with these systems. Larger coils heat faster, and the Hot Start system doesn't turn on the fan until the desired temperature is reached, so it never blows cold air. What's more, select models use Hyper-Heating INVERTER (H2®) technology that operates effectively down to -13° F. With this improvement, these models give true year-round comfort from a single system.

Eco-comfort technology, triple-allergen filtration, whisper-quiet operation.

Eco-comfort technology makes these systems smarter in how they use energy – and minimizes their impact on the environment. Plus there are many advanced features – like the i-see™ Sensor, that automatically detects room temperature differences and adjusts for greater comfort. And our triple filtration system dramatically reduces allergens.

Other updates to the line include a sleeker, lighter color finish and front access to the terminal block. And new controls with a “Smart Set” button for ultimate comfort. And now the indoor units operate starting at a19dB(A) – that's even quieter than a human whisper.

Easy installation, simple service, longer warranties.

As always, Mitsubishi Electric's units are easy to install with no ductwork. They're also designed for easy servicing – although, with our industry-leading reliability record, you won't have to worry much about that. Better yet, we've extended our warranties to seven years on compressors and five years on parts.

INDOOR UNITS

M-SERIES
residential and select commercial

P-SERIES
large residential, varied commercial, and institutional

 MS-A09, 12WA Wall-mounted Nominal Btu/h: 9,000 - 12,000 SEER: 13 (NON-INVERTER, 115V)	 MSY/MSZ-GE09, 12, 15, 18NA Wall-mounted Nominal Btu/h: 9,000 - 17,200 SEER Range: 19.2 - 21 HSPF (MSZ UNITS ONLY): 10	 MSZ-FE09, 12NA Wall-mounted Nominal Btu/h: 9,000 - 12,000 SEER Range: 23 - 26 HSPF Range: 10 - 10.6	 PAR-21MAA Wired Remote Controller (standard with SEZ indoor units)
 MSY/MSZ-GA24NA Wall-mounted Nominal Btu/h: 22,000 SEER: 17.5 HSPF (MSZ UNITS ONLY): 9.5	 MSY/MSZ-D30, 36NA Wall-mounted Nominal Btu/h: 30,700 - 34,600 SEER Range: 14.5 - 16 HSPF (MSZ UNITS ONLY): 8.2	 SEZ-KD09, 12, 15, 18NA Horizontal ducted (for MXZ systems) Nominal Btu/h: 9,000 - 17,200 SEER Range: 14.5 - 15.5 HSPF: 8.5 - 9.5	 M-Series Remote Controller
 PKA-A12, 18, 24, 30, 36KA/KAL Wall-mounted Nominal Btu/h: 12,000 - 34,200 SEER Range: 14 - 17 HSPF Range: 8.9 - 10.8 (PUZ-NHA3 ONLY)	 PCA-A24, 30, 36, 42KA Ceiling-suspended Nominal Btu/h: 24,000 - 42,000 SEER Range: 14.4 - 16.8 HSPF Range: 9.2 - 10.9 (PUZ-NHA3 ONLY)	<div style="border: 1px solid black; padding: 5px;"> <p>BENEFITS</p> <ul style="list-style-type: none"> • INVERTER Technology • Precise Comfort Control • Quiet Operation • Ducted and Ductless Models • Environmentally Friendly • Wireless Remote Control • Flexible Indoor Unit Styles </div>
