

Help

This CD is designed to help you make the most of the ENERGY STAR program. To access the files directly from the CD, click on the "View/Save This Item" button and the file will be opened in its respective viewer. Please review the CD instructions at right for additional explanation and tips.

CD Instructions and Tips

We hope you find this CD is as easy to use as selling and installing ENERGY STAR qualified Gorell products!

When you insert the CD into your computer drive (CD or DVD), it should automatically be recognized and start. Once you see the title screen, select the section from the top navigational area you would like to view. Then "mouse over" the thumbnail boxes at the bottom of the screen. This will allow you to see details about that topic.

Some sections have more than five visible thumbnails at the bottom of the screen. To see if there are additional topics, mouse over the thumbnail on the very right side of the page. If there are additional thumbnails, you will see an arrow that you can mouse over to display more topics.

Once you are in a particular topic area, you will typically have additional selections to make, depending on your interests and needs.
