DREAM WINDOW *with Ultra Master III™*

You will be hard pressed to find more energy-efficient windows than Dream windows with Ultra Master III glass. These ruggedly attractive windows feature fusion-welded, heavy-duty frames and sashes, Insulfil™ foam in the frame chambers and a glass system that achieve remarkable U-values—ensuring your home is always comfortable and less costly to heat and cool.

Dream windows with Ultra Master III also include advanced constant force balancing in double-hung models for easy fingertip operation and cleaning. These triple-pane glass products feature two different Low-E coatings, krypton gas fill and a highly advanced spacer system. They are so efficient that they are ENERGY STAR® qualified for all areas of the country.

You can select from a myriad of options to truly customize these windows. Choose from several beautiful interior vinyl woodgrain finishes, numerous exterior color options, between-the-glass mini-blinds, easy-cleaning glass and much more.

DREAM MASTER III

DreamMaster III windows provide exceptional energy efficiency, unparalleled comfort and long-lasting durability. These beautiful windows feature a sleek frame profile accentuated with an elegant 5-line millwork design. Frames and sashes are fusion-welded for superior strength. The constant force balancing system in double-hung models lets you open and close them with unbelievable ease. Both sashes tilt in and lock securely for easy cleaning.

The high-performance glass system in these ENERGY STAR® qualified windows includes triple-pane glass with two internal Low-E coatings, a special krypton and argon blend between the panes and the acclaimed PPG Intercept® spacer.

Dream windows have been laboratory tested to stringent government standards. All models in the Dream series qualify for the ENERGY STAR label.

ENERGY AND EXQUISITE BEAUTY.

DREAM WINDOW *with AC Master*[®]

Beautiful Dream windows with AC Master glass provide maximum viewing area as well as strong, dependable thermal performance. Their millwork design and sleek profile make them a favorite among homeowners who appreciate value and beauty.

These ENERGY STAR[®] qualified products feature double-insulating glass with one internal Low-E coating, argon gas between the panes and PPG's Intercept[®] spacer system. Frames and sashes are fusion welded for lasting durability, and an enclosed constant force balancing system in double-hung models allows for easy opening and closing.

Dream windows are made by Gorell—National ENERGY STAR[®] Partner of the Year every year since 2004, and Sustained Excellence Award winner in 2006, 2007 and 2008.

The Composition of Finely Engineered and Crafted Dream Windows

DreamHome Remodeling, Inc. recognizes that homeowners like you want to work with a remodeling company that can be trusted to deliver quality work at a fair price. We also know that beauty, value and energy efficiency are very important to you, so we've made it our mission to research the finest, most advanced products on the market today. We traveled to Pennsylvania and Ohio and contacted manufacturers as far as Minnesota to find the highest quality products

to use in the industry. We then worked to pair the finest windows and doors—manufactured by Gorell—with expert installers. It's this combination that has made DreamHome truly unique. Unlike other remodeling companies that talk about how inexpensively and quickly they can complete a job, we address your project from another perspective: "What can we do to help in creating your dream home?"

DreamHome backs up its products with—not one—but numerous programs to ensure your satisfaction with Dream windows. These include our special **90-DAY MONEY-BACK GUARANTEE**, one of the absolute finest window warranties in the country, our 40% Energy Savings Pledge and exclusive financing programs—with no money down on any window project—to make your "dream come true!" Ask your DreamHome window professional for all the details.
