Select from Options that Provide a Distinctive, Attractive Appearance.

Duramade windows feature a distinctive profile that's accentuated by elegant dual millwork lines. You can select from Soft White or Almond interior vinyl finishes that provide a distinctive, attractive appearance and complement the style of any home. You also have an array of other options to choose from to have your windows give your home a unique, personalized look.

EXTERIOR COLORS

An array of beautiful, exterior color finishes allows you to coordinate or contrast your windows to the colors of your home.

SOFT WHITE GREYSTONE BRICK TERRA ALMOND CLAY TUDOR BROWN FOREST

Printed images of colors vary, so please ask your window professional to see actual samples.

SOLARSHINE™

This specialty glass stays cleaner longer because its unique coating loosens and breaks down dirt, and because water "sheets" off the glass instead of beading.

INTERNAL GRIDS

Finely detailed contoured internal grids give windows the look of divided lites, yet make window cleaning easy because the grids are between the glass panes.

BETTERVUE™ SCREENS

These unique screens offer a sharper view of the outdoors and improve airflow and ventilation.

SPECIALTY SHAPES

Choose from a myriad of specialty-shaped designs—including half round, full circle, trapezoid, octagon, cathedral and many more.

Our Exceptionally Tough Duramade Hurricane Impact Windows Provide Superb Storm Protection and Energy Efficiency.

Duramade Hurricane Impact Windows protect homes against airborne debris from strong winds, storms and other forms of violent weather. They also provide numerous additional benefits—they help protect your family from intrusion, block damaging UV rays, make your home safer, deaden sound and help curb home energy costs.

In the event of severe weather, you won't need to do anything with your new Duramade windows other than to ensure that they're closed and locked. And—unlike windows covered by shutters or plywood—you'll have daylight in your home to cope with the situation when the electricity is out before, during and after bad weather.

These windows easily pass ASTM Large Missile Impact Level "D" tests, so they can be installed anywhere, even right on the coastline.

The heavy-duty, multi-chambered frame and sash construction of Duramade windows—and the thermal properties of the insulating glass system—also makes them highly energy efficient. You'll experience greater comfort in your home and lower home energy consumption year round.

INTERNATIONAL HURRICANE PROTECTION ASSOCIATION — IHPA

Gorell, the manufacturer, is a proud member of IHPA.

SLIDING DOORS

Our hurricane sliding doors are DP-50 rated and are also tested and approved for Large Missile Impact.

Double-hung Duramade hurricane impact model in soft white.

NATIONAL CRIME PREVENTION COUNCIL

Duramade windows are made by Gorell, a proud partner with the National Crime Prevention Council.

www.ncpc.org

We offer windows made by Gorell Enterprises, 2004 to 2008 ENERGY STAR® Partner of the Year. 2006, 2007 & 2008 Sustained Excellence Award winner.

Standard Features of Duramade Hurricane Impact Windows

1. Duramade Hurricane Glass System—with three panes of glass and a protective laminated interlayer—provides exceptional protection against airborne debris and other dangers from violent weather. The glass is deeply embedded into the frame, offering optimum structural integrity.*
2. Rigid tubular master frame—with all the corners fused together at high temperatures for extraordinary strength—has 13 separate chambers to improve insulating properties, as well as strength and rigidity. Insulfil™ foam inside the frame chambers enhances thermal performance.
3. New heavy-duty constant force balance system—with stainless steel reinforced attachment points—gives you fingertip operation on even the largest of double-hung models.*
4. Two heavy-duty cam sweep locks hold sashes in place during violent weather and will also keep your home safer and more secure. From the outside looking in, they cannot be seen, which gives your windows a more attractive appearance.
5. Soft white vinyl—clear through—complements practically any architectural style and is pleasing to the eye.
6. Zamac 3 zinc-aluminum tilt latches on double-hung models also help keep sashes secure during violent weather, yet let you tilt in sashes easily to make cleaning a breeze.
7. Automotive-type window glazing creates a super-tight seal.*
8. Insulating foam wrap around the frame significantly reduces the possibility of drafts.

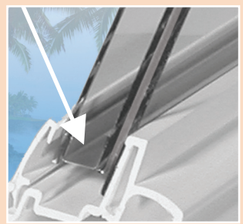
** Feature not visible in photograph.*

Duramade hurricane products are available in several styles, including double-hung, sliding and picture window models.

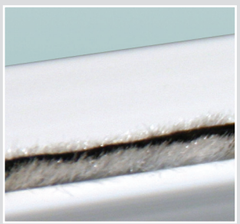
We also offer Level "C" hurricane impact windows for both replacement and new-construction applications.

9. A high-performance Low-E coating and argon gas between the glass panes ensure that Duramade impact windows help lower home energy costs and make your home more comfortable.

10. PPG Intercept® warm-edge spacer system reduces energy loss through the glass.



11. Special double weather stripping seals out drafts and dust and improves insulation and window performance.



12. Distinctive dual millwork lines on the interior master frame provide a look of handcrafted molding.
