We offer designs from French doors to traditional sliding models to let you enjoy the view outside—from within the comfort of your home. These durable, heavy-duty vinyl doors are engineered to keep your energy bills low—and operate smoothly for years without maintenance. Plus, they add a special touch of distinction to the appearance of your home.

Gorell vinyl patio doors are engineered and custom manufactured to:

- Help lower your home energy costs.
- Improve security in your home.
- Make your home more comfortable and draft-free.
- Ensure that doors and screens operate smoothly.
- Enhance your home's appearance.
- Be maintenance-free.

#### AVAILABLE PATIO DOOR STYLES AND STORM DOORS

##### Hinged Patio Doors

[Hinged patio doors](#) offered by Gorell include: Single-door, French, Center-hinged, Side-hinged and Three-Lite Swing. These doors blend beautiful classic design with precision engineering and heavy-duty construction. Hinged doors offer you more security with an optional multi-point locking system and a different architectural look than traditional sliding models.

##### Sliding Patio Doors

[Gorell sliding vinyl patio doors](#) are available in two- and three-lite models. The precision engineering behind these products results in smooth, easy operation and tight, secure closure. These doors feature a two-point multiple locking system and solid, zinc-plated steel tandem rollers that act a lot like your car suspension.

##### Storm Doors

[Gorell storm doors](#) have a unique look and feel. They're extremely sturdy and operate so much smoother than other brands. Plus, they feature double-strength tempered safety glass wrapped with marine glazing seals for better cushioning and a snug fit.

##### Therma-Tru Entry Doors

The Gorell Factory Outlet is proud to now offer [Therma-Tru Premium steel doors](#). Class-Craft®'s exquisite fiberglass finish looks like premium wood, but without a premium price. And Class-Craft® does things wood doors only dream of—like not crack, warp or split. And it's five times more energy-efficient. There are dozens of styles, decorative glass and transom options, too. Stop by the outlet to see our Therma-Tru door display.

Insist on ENERGY STAR® qualified products to realize maximum energy savings and comfort. Practically all Gorell windows and doors are ENERGY STAR qualified when you select a Gorell Low-E (low emissivity) glass system option. To learn more about ENERGY STAR [click here](#).
