

TIMELESS™

*windows & doors*

BY GORELL

## Why you should select Timeless windows for *your* home

Unlike the multitude of poorly made products in the marketplace today—including some manufactured in faraway lands—Timeless windows are made to outlast your home itself and look just as beautiful in 50 years as the day they first graced your home.

These exceptional windows and doors are made in America by Americans, using the finest materials and 21st-century technology. They're manufactured by a company known—and recognized—for innovation and constant improvement. These are high-performance products that stand the test of time.

Timeless windows are expertly designed and manufactured with exacting precision so that you will never have to replace them. They are truly Timeless.

Timeless windows bring smiles to people of all ages because of all they do—like making homes more beautiful, lighter, brighter, and more comfortable to live in.

## Be more comfortable *and* enjoy

Timeless windows are specifically designed to be as energy efficient as they are beautiful. You and your family deserve to be comfortable in your home year round—and NOT have to pay high energy bills.

Every Timeless product incorporating any of our high-performance glass systems qualifies for the ENERGY STAR® label. It's everyone's responsibility to save energy, and selecting ENERGY STAR qualified products is one of the best ways to do so.

Values for aluminum, wood and typical vinyl windows were obtained from LBNL Windows W5 generic window components. Actual values may vary.

“U-Value” indicates the rate of heat flow that escapes your home when you want to keep the heat in. “Solar Heat Gain Coefficient” (SHGC) indicates the rate of heat flow that enters your home when you want to keep the heat out.

# lower home energy bills

Making homes more energy efficient and comfortable is what Timeless windows do best. It's no coincidence that they're made by the company that has achieved unparalleled national ENERGY STAR® recognition from the U.S. Department of Energy and Environmental Protection Agency.

Soft White Timeless Plus™ double-hung and casement windows with Colonial-style grids and specialty shaped half-round windows with spokes-style grids.

# Peace of mind—standard on all Timeless windows

Because they're engineered to be so strong and durable, Timeless windows help protect your loved ones from intrusion—and harsh weather. Solid multi-chambered frames with tough, heavy-duty locks and hardware make Timeless products some of the most formidable windows and doors in America.

## Easy to use, nothing to maintain

Timeless windows operate smoothly, quietly and reliably for years and years without the need for you to do a single thing to maintain them. No lubrication, no painting. Even cleaning them is remarkably easy—and fast.

The sleek thin-line frame design of Timeless windows brightens your home on the inside and gives it the look of classic beauty on the outside.

Exclusive window partner with the National Crime Prevention Council, offering intruder-resistant windows & doors.

# Qualities that make Timeless beautiful and easy to use

You can select from two elegant Timeless product series to make your new windows perfect for your family. Timeless "Plus" windows, our ever-popular double-hung style shown at left, feature an exceptionally wide range of options. Metal reinforcement is standard, as are many other fine features.

**1.** Heavy-duty frames are fused together at the corners at temperatures near 500° F. This solid one-piece frame design provides maximum strength and resistance to water and air, unlike most other windows that are held together with screws and caulking.

**2.** Stainless steel "Constant Force" balance system ensures fingertip operation on double-hung models.\*

**3.** Automotive-type glazing system creates a super-tight seal.\*

**4.** Special premium-grade weather-stopping systems block air and water infiltration for optimum window performance.

**5.** Beautifully styled, heavy-duty cam action sweep lock keeps your home safe and secure. Paired with a rugged metal lock keeper that's fastened perpendicularly to the sash frame, it enables Timeless Plus windows to pass rigorous AAMA forced-entry tests with ease.

**6.** Easy-to-use latches on double-hung models provide "tilt in" operation to make cleaning fast and easy.

**7.** Insulating closed-cell foam wrap around the frame perimeter significantly reduces drafts from penetrating between windows and walls.

**8.** Intercept® warm-edge spacer system reduces heat loss through the glass and has proven to be the best system for glass seal longevity.\*

\* Feature not visible in photograph.

# Plus™ windows so energy efficient, strong,

9. Insulfil™ foam in the frame improves thermal efficiency to help lower home energy costs.

10. Sleek push-button ventilation latches allow you to open these windows partially for ventilation.

11. Aluminum-reinforced meeting rail interlock adds structure and allows the lock and lock keeper to fasten through the vinyl into the metal.

12. The smooth, non-porous finish of the vinyl is a major reason Timeless Plus windows can maintain their beauty and durability for decades.

13. Heavy-duty sloped sill helps to keep your windows looking their best. Rainwater drains away completely and the sill is easy to clean. The bottom sash latches onto the sill for superior strength and durability.

14. Heavy-duty extruded screen frames and fiberglass screen cloth are standard for durable and unobtrusive insect protection.

**Timeless Plus styles include double-hung, picture window, and two- or three-lite slider window models.**

# Qualities of our traditional Timeless windows

1. Robotically sealed corners ensure the window stays square and will never require sealants. They also will prevent water and air from entering your home.
2. Expertly engineered, durable vinyl frame with multiple structural hollows provides exceptional strength and insulating properties.
3. Unique ventilation limit latches allow you to let in refreshing breezes without sacrificing safety and security.
4. Gorell's "Constant Force" balance system on double-hung models lets you operate your windows with just the touch of a finger.\*
5. Premium-grade multi-fin weather seals create an airtight seal.\*

6. Easy-pull tilt latches on double-hung models provide "tilt in" operation on both sashes for unbelievably easy cleaning.
7. The Intercept® warm-edge spacer system is time-proven for long-term seal dependability and exceptional thermal performance.\*
8. Almond (optional) or soft white vinyl frames feature a silky smooth, clean surface that will look beautiful for decades.
9. Insulating foam wrap creates another barrier to eliminate drafts coming up through your home's wall cavities.
10. Classic millwork design provides an elegant look typically associated with handcrafted moldings.

\* Feature not visible in photograph.

11. Heavy-duty, custom-designed hardware gives your windows vise-like strength and security, yet it's recessed into the sash so that it's practically invisible—giving your home an even more beautiful appearance.

12. Rugged, heavy-duty integral lift rail is indestructible and is built to stand up to regular, everyday use. This attractive feature makes the window easy to operate.

13. New, heavy-duty one-piece sloped sill design provides exceptional strength and rigidity. The bottom sash actually latches onto the sill, providing a super-tight seal. You can also choose our integral pocket sill design.

Elegant Timeless Plus™ windows, topped by a center half round, and featuring color-matched internal Colonial-style grids.

# More exceptional products to complement your Timeless

**Bow and Bay Systems**

Nothing can open up a room, introduce light and expand your view of the outdoors quite like a beautiful bow or bay window. These systems come in numerous styles and designs to give your home a unique and beautiful appearance—inside and out.

**Casement and Awning**

Known for their ability to create an airtight seal for superb energy efficiency and worry-free security, these windows let you “catch a fresh breeze” with the turn of a handle. They’re available in a myriad of configurations and styles to give your home an attractive, unique look.

# windows

Sliding Patio Doors

Enjoy the view outside from within the comfort of your own home. These durable, heavy-duty doors are engineered with your energy bills in mind. They'll operate smoothly and dependably for years without maintenance. Available in two- and three-panel models.

Hinged Patio Doors

Hinged patio doors embody the essence of classic styling. The French-door model will add a touch of elegance to your home. Custom design your door by selecting from numerous options, such as decorative glass, grids and security glass. Available in various configurations.

Storm Windows and Doors

Storm windows and doors never looked so good. Heavy-duty aluminum storm products help protect your primary windows and doors from the elements. They will also help lower your home energy costs and keep your home more comfortable.

# Selecting the right glass for you

With all Timeless series windows, you can choose from numerous high-performance glass systems for just the right level of comfort and energy-saving efficiency—and security—that you prefer for your home.

Timeless glass systems feature technologically advanced Low-E coatings, the industry's most effective spacer system, and natural, efficiency-enhancing inert gases between the panes. Our special security glass system also includes a tough—though invisible—laminated interlayer that is the key to keeping intruders and objects from breaking through.

All Timeless products that incorporate any of these optional high-performance glass systems qualify for the U.S. Department of Energy's ENERGY STAR® label. They also filter out a significant portion of the ultraviolet light spectrum that can fade draperies, carpeting and other home furnishings.

SolarShine™ features a unique transparent coating that helps keep windows cleaner longer. The coating is so smooth that most dirt doesn't "hold on to" it, and it also loosens and breaks down dirt that does adhere to the glass.

Timeless high-performance windows—GreenSpec labeled for their energy efficiency and environmental benefits.

Soft White Timeless double-hung windows—not your ordinary windows.

# Options to make your home truly timeless

Equilibrium stained glass design with gold leading.

## Woodgrains

The problem with wood windows is that they begin deteriorating the moment they're made. Now you can enjoy the beauty of different woods without swelling, rotting and all the other maintenance problems of wood. Select your Timeless Plus windows with strikingly beautiful vinyl woodgrain finishes—Golden Oak, Cherry, or Walnut—on the interior, then choose from a myriad of attractive exterior color finishes.

## Decorative Glass

Give your windows—and home—their own special character by selecting breathtaking decorative glass. Choose from a variety of stained and leaded glass designs, or V-grooved and etched glass patterns. Unique faux art designs are another alternative that offer an elegant, beautiful appearance at a great cost.

*Printed images of colors, woodgrains and decorative glass may differ slightly from actual colors and patterns.*

#### SolarShine™ Glass

SolarShine™ represents an amazing new glass technology that actually keeps your windows and doors cleaner longer. Its built-in transparent coating is so smooth that most dirt just can't adhere to it. A light spray of water—or rainfall—will wash the dirt away and dry spot-free as the water sheets off the surface.

#### Colors

Coordinate or contrast the color of your windows and sliding doors to the color of your home by selecting one of numerous beautiful exterior color finishes—including Forest, Brick, Clay, Terra, Greystone or Tudor Brown! Give them a truly unique look by combining your exterior color choice with one of our fine interior finishes—Soft White, Almond, Walnut, Cherry or Golden Oak.

#### BetterVue™ Screens

These unique screens will give you a sharper view of the outdoors—and the added airflow you'll get for ventilation is almost like having no screen at all!

#### InterBlinds™

Sealed between two panes of glass, InterBlinds are a great alternative to traditional wall-mounted blinds and draperies. Of course all blinds are beautiful and offer instant privacy, but InterBlinds stay pristine, clean and beautiful—and they're sealed away from little hands. Tilt the blinds with fingertip ease to obtain just the right view—or close them for complete privacy.

### Obscure Glass

While you expect light from your windows, sometimes you can do without the view—or you don't want to be the view for others. For those places in your home where you need privacy, choose from a wide selection of distinctive obscure glass patterns. Incorporate them into bathrooms or other accent areas for privacy—or just a touch of beauty.

### Uniquely Shaped Windows

Windows don't have to be simply rectangular anymore. Move full-speed into 21st-century home architecture by adding the exciting new dimension of Timeless specialty-shaped windows to your home. Choose from Circles, Half Rounds, Trapezoids, Eyebrows, Quarter Rounds, Triangles, Pentagons, Ellipses and more. You can have Timeless windows in almost any shape you can envision.

### Internal Grids

Does the traditional look of divided-lite windows appeal to you? Then select our exquisite internal grids for your new Timeless windows. Because these beautiful grids are between the glass panes, they never need to be cleaned. Available in numerous styles.
