Today, who wouldn't buy ENERGY STAR® central air?

In today's economy, ENERGY STAR has never made more sense:

Better Comfort – ENERGY STAR central air units are quieter, require less maintenance, and give you better control over your home's temperature and humidity.

Better for the Planet – Up to 50% reduction in environmentally harmful emissions.

Big Savings in Energy and Money – Up to half of your home's annual energy cost is in heating and cooling. And new ENERGY STAR central air units are up to 40% more efficient than standard equipment. You could save hundreds over the life of the unit.

Start Saving Right Now! Upgrade now to an ENERGY STAR system and receive up to a $500 rebate.* Double your rebate* by participating in *Home Energy Solutions*, the home energy assessment program from the Connecticut Energy Efficiency Fund and The United Illuminating Company. And get another $500 rebate* for selected ENERGY STAR systems through the *Connecticut Appliance Rebate Program*. **That's up to $1,500 in combined savings**, not including additional federal tax credits for which you may also qualify!
