

Remember, saving energy prevents pollution. You can reduce the amount of energy your refrigerator or freezer uses, with the following steps:

- Position your refrigerator away from a heat source such as an oven, a dishwasher, or direct sunlight from a window.
- To allow air to circulate around the condenser coils leave a space between the wall or cabinets and the refrigerator or freezer and keep coils clean.
- Make sure the door seals are airtight.
- Keep your refrigerator between 35° and 38° degrees Fahrenheit and your freezer at 0° degrees Fahrenheit.
- Minimize the amount of time the refrigerator door is open.
- Recycle older or second refrigerators.

Other Ways To Be Energy Efficient:

Use ENERGY STAR® Qualified Light bulbs - ENERGY STAR qualified lighting uses 75% less energy than conventional light bulbs and lasts up to 10 times longer, meaning less time spent purchasing and replacing burned out bulbs.

Tune-Up Your HVAC Equipment Yearly - Just as a tune-up for your car can improve your gas mileage, a yearly tune-up of your heating and cooling system can improve efficiency and comfort.

Install A Programmable Thermostat - A programmable thermostat is ideal for people who are away from home during set periods of time throughout the week. Through proper use of pre-programmed settings, a programmable thermostat can save you about \$150 every year in energy costs.

LIPA's Home Energy Center - Another smart way to become energy efficient is to visit LIPA's on-line Home Energy Center at www.lipower.org. The Home Energy Center has useful information on how to analyze and improve your home's energy efficiency. Taking steps today to be more energy efficient will help control your electric energy costs and create a greener, cleaner Long Island.

Congratulations on your decision to buy an ENERGY STAR qualified refrigerator. It's good for you, your family, and the environment. Thank you!

\$75

Select ENERGY STAR® Qualified Refrigerators

Efficiency Long Island brought to you by:

www.lipower.org/efficiency

ENERGY STAR® qualified refrigerators save energy, save money, and help protect the environment.

New ENERGY STAR qualified refrigerators are at least 20% more efficient than new conventional models and 40% more efficient than refrigerators sold in 2001. ENERGY STAR qualified refrigerators:

- Have high efficiency compressors
- Are made with improved insulation
- Have more precise temperature and defrost mechanisms
- Are available in top, bottom, and side-by-side freezer styles.

For a limited time only, LIPA is offering their residential electric customers \$75 back on the purchase of an **ENERGY STAR qualified refrigerator larger than 16 cubic feet.**

Did You Know?

In most households, the refrigerator is the single biggest energy consuming kitchen appliance. Replacing a refrigerator bought in 1990 with a new ENERGY STAR qualified model can save enough energy to light the average household for nearly four months!

Join the national effort to help use energy wisely. Buy appliances that have earned the ENERGY STAR label. Only products delivering the highest level of energy efficiency are awarded the ENERGY STAR label from the U.S. Environmental Protection Agency and the U.S. Department of Energy.

Just Look for the ENERGY STAR
