

A new light in the house.

Bright light. Brighter savings with LED technology.

ENERGY STAR® qualified residential LED products use at least 75% less energy than incandescent lighting, and are rated to last at least 25,000 hours. You can save hundreds of dollars every year on your lighting costs and practically eliminate the need to ever replace them. LED bulbs have brightness equal to or greater than existing lighting technologies, and give off light closer to the color of daylight than non-LED bulbs. They turn on instantly, do not flicker when dimmed, and use standard size bases, so they can be used with many of your existing fixtures.

Click your way to savings at LIPA's exclusive online store

Save on a variety of energy efficient products at LIPA's online store exclusively for LIPA residential customers. From our new LED products and compact fluorescent bulbs to energy efficient interior and exterior lighting fixtures, LIPA's online store brings you the power to save while helping to protect our environment.
